

# Enki

Enki ha un aspetto essenziale ed avvolgente al tempo stesso. Dialoga con i sensi per una esperienza tattile e visiva molto stimolante. Non si lascia solo guardare ma, vuole essere osservata, capita, correttamente definita. Poche e semplici linee per delineare il concetto di originalità come ritorno alle origini,

all'archetipo, al bello in se. *Enki's look is essential yet fascinating. Communicating with the senses, it creates a highly stimulating tactile and visual experience. Not only does it allow one to look, but it wants to be seen, understood, and properly defined. A few simple lines outlining the concept of originality as a return to origins, to the archetype, to beauty itself.*
