

KALEIDO

Modular range with or without backrest.

Versions:

- One-color
- Two-colors (inverted colors)

....M
Monocolore
One colour

....B
Bicolore
Two colours

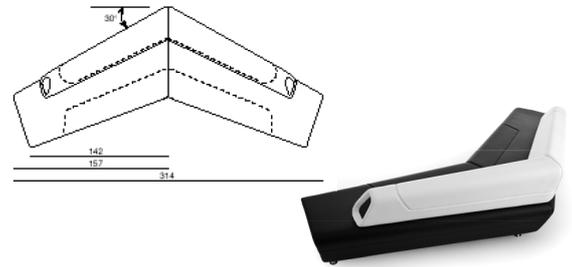

Seat: steel frame, with upper injection of fireproof polyurethane, springing through elastic belts. Density +/- 90 Kg./m3.

Backrest: steel frame, with upper injection of fireproof polyurethane. Density +/- 70 Kg./m3.

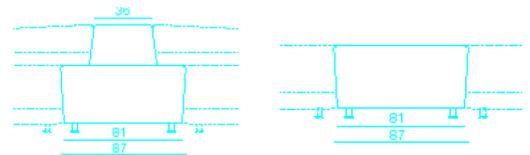

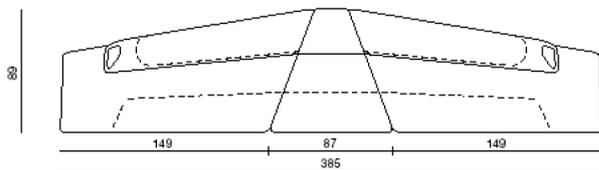

Supporting glides: anti-slip cylindrical glides in polished aluminum.

Elements matched in the deepest part, create **120° angular compositions**.

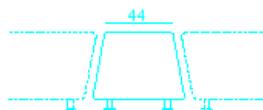

A single angular element (with or without backrest) creates **front linearity** between the various matched elements.

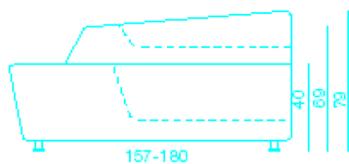

More **angular single elements** matched, can create “coil” compositions.

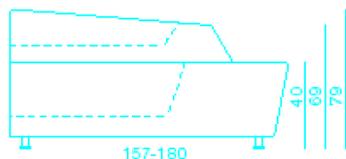

The linking element gives **linear continuity** to the modular elements.
